## About

Machine Learning Engineer and Software Developer focused on scalable ML solutions and real-world applications in deep learning and predictive analytics.

## Education

**Indian Institute of Technology, Bhilai** Sep. 2022 – May 2024  
*Master of Technology in Computer Science (CGPA 9.01)* Bhilai, Chattisgarh

**G H Raisoni Institute of Engineering and Technology, Pune** Jul. 2017 – Nov. 2021  
*Bachelor of Technology in Computer Science (CGPA 7.59)* Pune, Maharastra

**Sinhgad City School, Pune** Sep. 2007 – Jan. 2017  
*High Secondary Education (Percentage 88.86%)* Pune, Maharastra

## Technical Skills

**Frontend:** ExtJs • JavaScript • CSS • Bootstrap • React • HTML • FastHTML  
**Backend:** Spring Boot • Node.js • Java • Flask • Python • C++ • C • Rust  
**Database:** MySQL • PostgreSQL • MongoDB • Redis • MinIO • Trino  
**Automation and others:** Jenkins • Git • Selenium • Docker • Nginx • Linux • MLflow  
**Data Science & ML Tools:** FastAPI • LMStudio • Ollama • PyTorch • TensorFlow • langchain • PyG • NetworkX

## Experience

**Machine learning engineer** Jun. 2024 - current  
*IIT Hyderabad SRC Project NPCI* Hyderabad, Kandi

- Developed scalable incremental learning models using GraphSAGE and Elastic Weight Consolidation to address data drift in the NPCI fraud detection project, achieving a 35% boost in performance.
- Designed temporal ML models leveraging EDA and boosting techniques, improving precision by 40%.
- Built and deployed GST fraud detection models, increasing fraud identification rates by 50%.
- Implemented knowledge distillation on Graph Transformers using MLPs, reducing compute cost by 70% and training time by 90%.
- Developed GraphHyena, a link prediction model leveraging recent transactional links for accurate fraud detection.

**Teaching Assistant** Sep. 2022 – may. 2024  
*IIT Bhilai* Bhilai, Chattisgarh

- Responsible for supporting students in C Programming, Linux, Git, JavaScript, and Networking courses through concept clarification, lab assistance, and feedback.
- Involves teaching the students core concepts, resolving their doubts, and preparing assignments.

**Junior Software Developer** Jan. 2022 – July 2022  
*Enkin Lab India Private Ltd* Pune, Maharastra

- Worked as a software developer, contributing to multiple projects, which involved creating CRON jobs, setting up around 2 Jenkins pipelines for Continuous Integration automation, designing and implementing frontend features for 15+ web pages, building and deploying 30+ RESTful APIs in Spring Boot, and developing a web browser extension that improved workflow efficiency by about 20%.
- Utilized Jenkins to provide a continuous integration service to automate the entire process of loading the latest build code and test files, running the tests, and generating a report of the results once per day.

## Research work and Projects

**GraphHyena: A Hybrid Hyena-Driven Framework for Temporal Graph link Prediction.** Oct. 2025

- introduce GraphHyena, combining a Hyena sequence encoder with a Dynamic Temporal-Asymmetry Network to capture rich temporal and structural dynamics for dynamic link prediction, achieving state-of-the-art performance. [This work was submitted to BigData 2025].

**Imbalanced Graph Learning via Graph Attention Network and Variational Autoencoder.** June. 2025

- NPCI AEPS fraud detection Hackathon winner.
- Research paper reviewer.
- Fest organizer.
